UNITED STATES INTELLIGENCE BOARD
MEMORANDUM FOR THE UNITED STATES INTELLIGENCE BOARD
SUBJECT: Report on High-Level Coverage of Cuba

1. COMOR reports that in accordance with paragraph 1 c of USIB-D-41.14/53 a review has been made of the coverage of Cuba for the 2 weeks ending 28 August. The reporting period, based on the BRASS KNOB report of COMOR Working Group, is 15-28 August (CWG-BK-40).

During this period 13 BRASS KNOB missions were flown.

Area coverage in photography with 25% or less cloud cover amounted to 57% in the first week of the period and amounted to 75% in the second week.

"Island coverage as feasible." Of about 185 targets only 6 were not covered in the first week, 3 in the second.

"Coverage of highest priority targets" was good. All were covered during the period although in the second week the Guantanamo area search area was not completely covered.

2. Based on preliminary reports of the missions flown since 28 August coverage of the highest priority targets has continued high. Only Campo Florido was left uncovered in the 5 missions flown between 29 August and 2 September. The 3 September mission achieved some coverage before being recalled due to the proximity of a high-performance aircraft.
